

Christian Education in LUCSA – “contribute in enabling member churches to equip all their members for mission”

Christian Education is nothing new to the LUCSA member churches. In any Lutheran church teaching is part of the day to day business. Any congregation, any group amongst LUCSA member churches has experiences with Christian Education. Any church worker in any LUCSA member church in has been equipped to do Christian Education during his/her theological training. Several member churches of LUCSA have departments of Christian Education, Coordinators or Resource Persons, some have policies and strategic plans for Christian Education.

We have a huge treasure of living Christian Education assets in our LUCSA family. In all our activities, in all our planning we want to consider these resources, which are already available among us. **We want to build on this treasure and grow to higher heights.**

The role of LUCSA in the Southern Africa region is not of an implementer, but of a facilitator. Through workshops and seminars delegates of member churches are enabled to plan and implement projects and programmes in their respective churches. We want to maintain this role of LUCSA in the area of Christian Education. **The strategic goal of LUCSA in the area of Christian Education is “to contribute in enabling member churches to equip all their members for mission”.** To achieve this goal the interaction with other Departments and areas of concern in LUCSA will be very important. Through the interconnectivity synergy effects can be created, which ultimately will enhance the impact of all our efforts.

We want to create a Christian Education network in the region.
